

CERTIFICATE

Permission to use the test mark

“Effectively reduces microorganisms”

The
gui-lab Engineering Company Dr. Winkens
hereby confirms that the air purifier

Zepter THERAPY AIR® Smart

conforms to the requirements of the gui-lab quality mark.
This particularly confirms the high retention efficiency of the used filter stages against the smallest particles such as fine dust, bacteria, molds, and viruses. The viruses are primarily those that are transmitted via droplet infection (e.g. SARS-CoV-2).

Zepter Medical GmbH

is therefore granted the right to use the test mark shown below
in connection with the above-mentioned product.

Moenchengladbach, November 1st, 2021
