AQUAPHOR® filters help to reduce plastic waste and cut spendings on buying clean drinking water.

AQUAPHOR®
water filters

Comes in 4 different colours

○ white

● black

● cherry

● cobalt blue

Unique filter cartridge A5 Mg

Specifically designed to protect from scale and to reduce undesired substances (chlorine, heavy metals).

Enriches water with magnesium — for best taste and your well-being.

AQUALEN™ — a unique ion-exchange fiber (surface approx. 33 times larger than those of competitor filters), irreversibly binds heavy metal ions.

The cartridge capacity is 350 litres.

Pre-filter

Reduces sediments (sand, rust, etc.).

Unique microfibre AQUALEN™

Ion-exchange resin and activated carbon filter chlorine, organic compounds, pesticides, heavy metals and other harmful substances and effectively reduce water hardness.

Fine mesh

Retains even the smallest impurities.

AQUAPHOR®
water filters

Contemporary packaging

Delicious drinks

Filtered water improves aroma and taste of tea and coffee.

Reduces limescale

Kettles, coffee machines, humidifiers and other devices serve longer and require less maintenance.

Flavorful food

Cooking with filtered water reveals deep rich flavours of your dishes.

Service

Dishwasher safe.

Safety

Does not contain Bisphenol A (BPA).
